## Summary

Front-End Developer with 3+ years of experience, building a high-performance and responsive web applications using technologies such as **React.js, Nextjs(App router), JavaScript,Typescript**. Skilled in writing clean, reusable code and implementing intuitive UI/UX designs. Experienced with **Redux, Redux toolkit, REST APIs, HTML5, CSS3**, and component libraries like Material-UI. Strong problem-solving skills and a collaborative approach in Agile teams. Passionate about creating a responsive and Mobile-first design, optimization and cross browser compatibility.

## Skills

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3, JSON
- **Frameworks/Libraries:** React.js, Next.js (App router), Redux, React Router, Rsuite,
- **UI Libraries:** Material-UI, Ant Design, Bootstrap, Tailwind CSS, ShadCN, Styled components
- **State Management:** Redux, Context API, Redux toolkit, Rematch.js
- **Tools & Build Systems:** Webpack, Babel, NPM, Eslint
- **Version Control:** Git, GitHub, Bitbucket
- **APIs:** RESTful APIs, Axios, Fetch API
- **Performance Optimization:** Code splitting, lazy loading, memorization, Minimized the code, webp image file
- **Responsive Design:** Media queries, Flexbox, Grid, Mobile-first design, cross browser compatibility
- **Dev Tools:** Chrome DevTools, VS Code, Postman, Swagger, Hubspot CMS
- **Agile Practices:** Scrum, Jira
- **Soft Skills:** Teamwork, Problem-Solving, Time Management, Written clean, readable and maintainable code using consistent naming convention, Participated in code reviews to ensure code quality, identify bugs early, and sharing knowledge

## Work Experience

---

**ThinkJS Private Limited, Bangalore | Software Engineer**

**Aug 2023 - Present**

**Project :** AI based Travel Planner Platform ( [Spontaa](#) )

A smart travel platform using AI to generate itineraries based on user location, dates, group size, and travel preferences.

- Integrated **AI-based itinerary generation, delivering personalised travel plans in real-time with optimised routes**, must-visit spots, and activity suggestions.
- Integrated **AI-generated itineraries with Google Maps API and real-time weather** data based on user travel dates.
- Implemented secure **user authentication using both OTP (One-Time Password) and Google Sign-In**, ensuring a smooth and secure login experience.
- Built responsive **UI components, optimized API performance**, and ensured cross-device compatibility
- Built UI components for the **“Share Your Travel Plan” feature**, allowing users to share their generated itinerary with friends or family via a unique phone number.
- Coordinated closely with product manager and developers to gather and understand product requirements, translating them into actionable tasks and delivering key features within established time.

**Tech Stack:** NextJS(App router),Typescript, RematchJS, ShadCN, Radix/UI, Google Maps API,

**Project :** Health Care Counseling Platform ( [KnowThyWithin \(KTW\)](#) )

A **mental health** and career **counselling** platform providing services like **expert video sessions** and **appointments**.

- Built and deployed a **Progressive Web App (PWA) using Next.js**, enabling users to access platform features with native-like performance across devices.
- Built a **session booking system with real-time data handling, form validation, and user-friendly components** for seamless appointment scheduling.
- Developed and maintained multiple dynamic landing pages, fetching content and data through **integrated REST APIs, enhancing user engagement and SEO performance**.
- Contributed the **KTW Meeting platform integration, allowing secure one-on-one video sessions** between users and mental health/career experts using AWS Chime SDK
- Developed the **“Book a Session” feature from scratch, including intuitive UI components and seamless API integration** for scheduling appointments with professionals.
- Contributed to the KTW Admin Dashboard, enabling administrators to manage user and expert records efficiently with dynamic data rendering and search functionalities.

**Tech Stack:** ReactJs, Next.Js, Redux ,RematchJs, Styled Components, Tailwind CSS, Rsuite, React-slick - next-intl

**Project : Ed-Tech Online Streaming platform ( [Lifedemy](#) )**

An **online education platform** covering various domains such as **life skills, academics** and **Finances**, boasting over **87K active users**.

- Developed responsive and user-friendly interfaces for the LD Instructor Web App using ReactJS and Styled Components.
- Built a **calendar-based availability system**, allowing instructors to select and update their available dates and times, which reflected in real-time on the user-facing app.
- Implemented **JWT-based authentication**, including secure login and logout functionality for instructors.
- Contributed to the development of **LD Analytics**, a **data visualization dashboard** used by admin and business teams for performance tracking and reporting.
- Created dynamic reporting components and **reusable UI elements to display real-time metrics, charts, and session data**.
- Collaborated on the **LD session meeting feature**, enhancing front-end components for scheduling and hosting sessions

**Tech Stack: React JS , Redux toolkit ,React-router, Css, SCSS, Bootstrap**

---

**Iosys Software solutions Pvt Ltd | Web developer****Oct 2021 - July 2023**

**Projects :** [Next PathWay](#) [GK3 Capital](#) [Benevity](#) [J Morries Flower](#) Etc.

- Developed responsive and user-friendly interfaces for Web App using ReactJS , CSS , Javascript.
- Analyzing the design and development of websites pages and landing pages and blogs on Hubspot CMS.
- Proficient in using HubSpot CMS for building and managing websites.
- Created web pages and templates using the HubSpot drag-and-drop interface.
- Customized modules to suit specific project requirements.
- Created the blogs list and blog posts.
- Created Dynamic website pages using HUBDB.
- Ensured pixel-perfect alignment and visual consistency across different devices.
- Optimized website pages for performance End to End technical knowledge of website pages with responsive (Desktop,Tablet, Mobile )
- Implemented the landing pages in Next PathWay with 3D Parallax

**Tech Stack :ReactJS, Javascript,Redux toolkit , HTML5,CSS3, Bootstrap, HubDB**
